

Educational Theatre is for the passion-driven teacher, the educator who truly wants to make a difference by inspiring their students to learn the English Language through the use of the performing Arts.

Since 1992 we have been the first Company to produce Educational Plays in English. More than 28 years sharing over one hundred magical productions have given us the experience to successfully merge the theatrical experience with language education. We create an unforgettable experience on stage, off stage and in the classroom.
