

Your favourite website: Difficult to tell. I keep looking for websites all the time as I need to satisfy my curiosity or need for information.

A gadget you can't live without: my smartphone , since it gives me access to information, and a notebook, as I constantly need to write ideas and lists.

Something you'd never throw away: my old photos

Who or what inspires you? The chance to do something different, something new.

Useful teaching tool: My laptop. Everything I need can be found there. However, I could still teach a class without it (The benefits of 30 years' experience?)

Your favourite lesson: The one in which students are active all the time.

Your favourite bit about your talk: Technology can, in certain circumstances, enhance collaborative learning.

A lesson you've learnt while teaching: don't give up-
