

TESOL-SPAIN goes green.

Paper is a precious part of our life, with many life-enhancing uses. It can be a sustainable product, but only if it comes from responsible sources and is used efficiently and not wastefully.

Since 2012, TESOL SPAIN has been giving out USB sticks with session handouts to participants at our Annual Convention to avoid using more paper than strictly necessary. If you are a speaker at our Annual Convention, please send your handouts to the Publications Coordinator at publications@tesol-spain.org

Similarly, speakers at regional events are increasingly inviting attendees to request digital handouts of their talks. If you are a speaker at a regional event, contact the Area Coordinator and send your handouts in PDF or Word. They will make them available to attendees, uploading them to the Regions page of our website.

Our heartfelt thanks go to Macmillan, ANAYA, Trinity, Spain & Portugal and Cambridge Assessment English, Spain & Portugal, who have generously sponsored this initiative since 2012.

Since 2012, we also stopped providing a printed version of our newsletter three times a year. We now send out an electronic e-newsletter ten times a year to all our members and teaching associations. This is just one other way that we are trying to reduce the amount of paper produced

Small actions lead to big results.
