

Carlos Rico Castillo

Your favourite website: <https://www.ted.com/>

A gadget you can't live without: It is not a matter of a gadget... it is about having access to the Internet.

Something you'd never throw away: My books.

Who or what inspires you? Knowledgeable people who happen to be humble.

Useful teaching tool: A whiteboard, some markers and an eraser.

Your favourite lesson: The one where curiosity and will to learn motivate people to attend.

Your favourite bit about your talk: Tracing learning development. My research does not focus on two points in time (i.e. pre and post-test instances) but it concentrates on how an interlanguage changes across time.

A lesson you've learnt while teaching: Try your best to teach in a simple manner.
